Benchmark: The benchmark for the composite is the Barclays U.S. Aggregate Bond Index.

Minimum Account Size: All discretionary accounts in excess of \$5 million have been included in the composite.

Calculation of Results: Accounts are valued using trade date accounting and are denominated in U.S. dollars. Performance results reflect the reinvestment of interest, dividends and realized capital gains, and include cash, cash equivalents, convertible securities, and preferred securities, if applicable. Dividends and interest are recorded on an accrual basis and are net of all applicable foreign withholding taxes, if any.

Performance results are presented on a gross and net basis and include the reinvestment of all income. The net results reflect the deduction of 0.57% for the period prior to March 1, 2008 and 0.40% for the periods thereafter, representing the maximum advisory fees charged to client accounts during the respective periods in the Core Fixed Income Composite. The actual fees paid by a client may vary based on assets under management and other factors. Past performance is no guarantee of future results.

Dispersion: The dispersion of annual return is measured by the standard deviation across asset-weighted portfolio returns represented within the composite for a full year. Prior to October 1, 2009, the dispersion of annual return was calculated across equal-weighted portfolio returns. For periods where five or fewer accounts were included in the composite for a full year, standard deviation is not disclosed, as it is not considered meaningful.

Fee Schedule: The management fee schedule is as follows: 0.40% on first \$5 million, 0.35% on next \$20 million, 0.30% on next \$25 million, and 0.25% on anything over \$50 million. The actual fees paid by a client may vary based on assets under management and other factors.
