

# PNC Capital Advisors, LLC

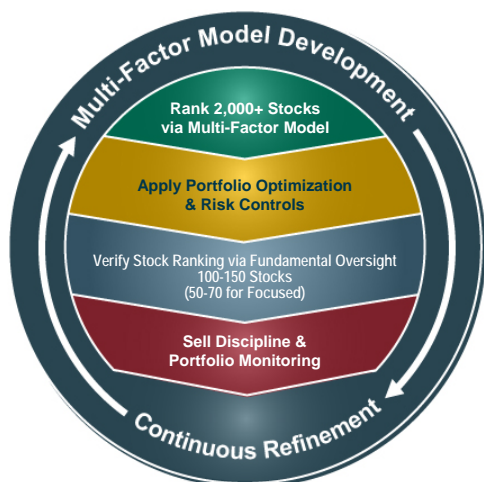

Structured  
Small/Mid Capitalization  
Core Equity Management

## INVESTMENT PHILOSOPHY

We believe quantitative methods can be developed to capture fundamental insights and capitalize on systematic market inefficiencies. Stock selection needs to be based upon sound scientific evidence. Key drivers of future stock performance are company valuation, fundamentals and investor interest. Technology enables us to identify attractive stocks in a systematic, disciplined and timely manner, resulting in consistent excess performance over time.

## INVESTMENT PROCESS

Systematic stock evaluation, portfolio optimization, fundamental oversight and continual evaluation drive the structured equity process.

### 1. Rank stocks (\$200 million-\$3 billion) via multi-factor model:

- Improving fundamentals
- Attractive valuations
- Improving sentiment

### 2. Applying portfolio optimization & risk controls:

- Top 20% of stocks
- Diversified by security
- Industry constrained

### 3. Verify stock ranking via fundamental oversight and construct portfolio:

- Forward-looking fundamentals
- Non-balance sheet items
- Integration of highly ranked stocks, optimization and validation

### 4. Sell discipline & portfolio monitoring:

- Inverse of purchase criteria
- Risk management
- Iterative process

We continually test and refine our investment management process through automated means at each stage, including the model, portfolio and individual stock levels.

## TEAM

Our team applies substantial experience and expertise to managing structured equity portfolios.

- Structured to ensure maximum interaction, meeting constantly each day
- Cross-functional collaboration
- Credentialed team of four, holding three master's degrees, two PhDs and one CFA
