

High Yield Fixed Income

Third Quarter 2017

Investment Philosophy

We believe High Yield bonds represent a higher risk/reward opportunity within the fixed income investment spectrum. High yield offers:

- Potential for more “equity-like” returns, while generating higher current income
- Less sensitivity to interest rates versus long-term U.S. Treasury bonds
- Diversification benefits within an overall investment or fixed income portfolio given lower correlations to other asset classes

Investment Process

Our high yield investment strategy follows a disciplined approach to portfolio construction that balances quantitative methods and qualitative analysis with stringent risk controls.

1. High Yield Universe

- BB+ and below
- Approximately 1,500 issues
- New issuance

2. Systematic Screening

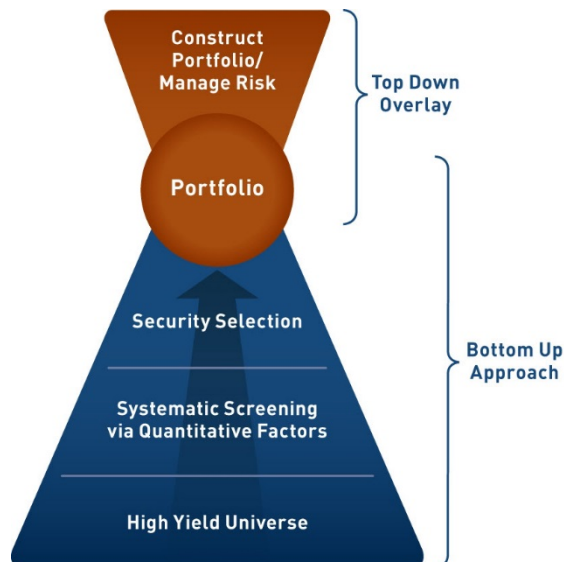

- Cash Flow
- Operating Strength
- Valuation

3. Security Selection

- Quantitative credit analysis
- Qualitative credit factors
- Capital structure
- Determination of relative value

4. Construct Portfolio/Manage Risk

- Diversification by issuer and industry
- Consistent sell discipline

September 29, 2009 through December 31, 2015. The verification and performance examination reports are available upon request.

Verification: Compliance with the GIPS standards for the predecessor firm (Allegiant Asset Management Company) was verified by Ashland Partners & Company LLC for the period January 1, 2008 through September 29, 2009, and by a previous verifier for the period January 1, 1998 through December 31, 2007. Performance presented prior to September 29, 2009 occurred while the investment team was affiliated with a prior firm (Allegiant Asset Management Company). In addition, a portability exam was conducted on the High Yield (Unrestricted) Fixed Income Composite by Ashland Partners & Company LLC for the period April 1, 2008 through September 29, 2009. Copies of the verification reports as well as policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. A list of composite descriptions is also available upon request.

Composite Description: The investment objective of the High Yield (Unrestricted) Fixed Income Composite is to seek current income as well as capital appreciation by primarily investing in a portfolio of U.S. non-investment-grade fixed income securities. Effective February 17, 2015, Sean Rhoderick, CFA, assumed the role of Chief Investment Officer for Taxable Fixed Income from Andrew Harding. Mr. Harding had served as Chief Investment Officer for Taxable Fixed Income of PNC Capital Advisors, LLC, and its predecessor firms since 2000. Results from all accounts have been continuous from the first full month under management to present or last full month under management. The High Yield (Unrestricted) Fixed Income Composite was created April 1, 2008.

Benchmark: The benchmark for the composite is the Bloomberg Barclays U.S. Corporate High Yield Index. The U.S. Corporate High-Yield Index measures the market of USD-denominated, non-investment grade, fixed-rate, taxable corporate bonds. Securities are classified as high yield if the middle rating of Moody's, Fitch, and S&P is Ba1/BB+/BB+ or below, excluding emerging market debt.

Minimum Account Size: All discretionary accounts in excess of \$5 million have been included in the composite.

Calculation of Results: Accounts are valued using trade date accounting and are denominated in U.S. dollars. Performance results reflect the reinvestment of interest, dividends, and realized capital gains and include cash, cash equivalents, convertible securities, and preferred securities, if applicable. Dividends and interest are recorded on an accrual basis and are net of all applicable foreign withholding taxes, if any.

Performance results are presented on a gross and net basis and include the reinvestment of all income. The net results reflect the deduction of 0.50, representing the maximum advisory fees charged to client accounts in the High Yield (Unrestricted) Fixed Income Composite. The actual fees paid by a client may vary based on assets under management and other factors. Past performance is no guarantee of future results.

Dispersion: The dispersion of annual return is measured by the standard deviation across asset-weighted portfolio returns represented within the composite for a full year. For periods during which five or fewer accounts were included in the composite for a full year, standard deviation is not disclosed because it is not considered meaningful.

Fee Schedule: The management fee schedule is as follows: 0.50% on first \$50 million, 0.40% on next \$50 million, and 0.35% on over \$100 million. The actual fees paid by a client may vary based on assets under management and other factors.
