

International Growth Equity

Fourth Quarter 2017

Investment Philosophy

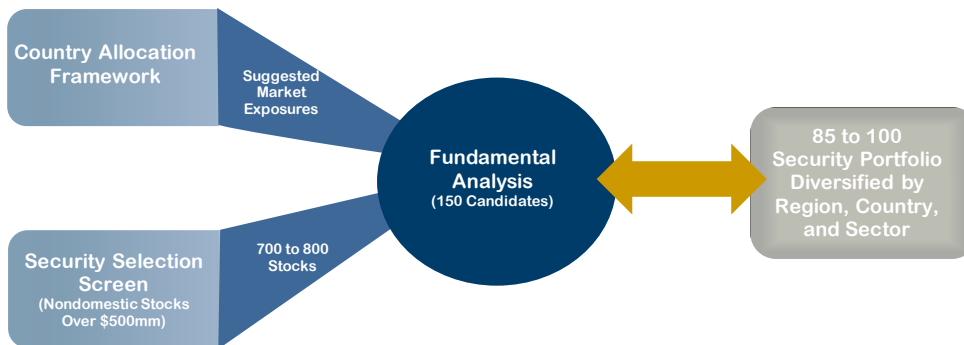

We believe stock prices are driven primarily by earnings growth within those international markets poised to outperform. We buy companies we believe:

- Exhibit sustainable and, ideally, accelerating earnings growth
- Possess high-quality balance sheets
- Are managed by experienced teams that have a clearly defined growth strategy

All positions fit within our top-down country allocation framework.

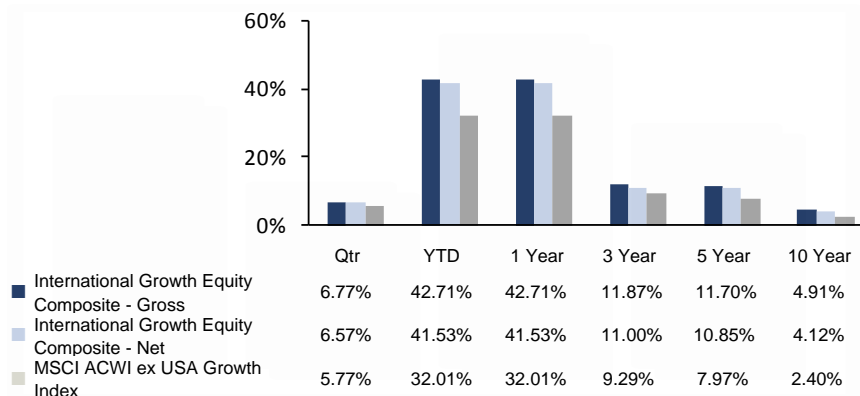

Investment Process

A top-down/bottom-up approach results in a diversified portfolio that is flexible to market conditions.

Performance Summary¹

Net of fee performance was calculated using the highest management fee of .75%, representing the maximum advisory fees charged to client accounts invested in the International Growth Equity Composite during the respective period. For information regarding the current investment advisory fees of PNC Capital Advisors, LLC, please refer to Form ADV, Part 2A, which is available at: <https://pnccapitaladvisors.com>. Verification: Compliance with the GIPS standards for the predecessor firm (Allegiant Asset Management Company) was verified by Ashland Partners & Company LLC for the period January 1, 2008 through September 29, 2009 and by a previous verifier for the period January 1, 1998 through December 31, 2007. In addition, a performance examination was conducted on the International Growth Equity Composite for the period January 1, 1998 through December 31, 2007 by a previous verifier. Copies of the verification reports as well as policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. A list of composite descriptions is also available upon request.

Composite Description: The investment objective of the International Growth Equity Composite is to seek capital appreciation by investing in a portfolio of equity securities of foreign issuers. Effective September 1, 2005, the Firm changed the composite name from International Equity to International Growth Equity to reflect the portfolio's focus on growth stocks. Results from all accounts have been continuous from the first full month under management to present or last full month under management. The International Growth Equity Composite was created September 30, 1997.

Benchmark: Effective March 1, 2016, the Firm changed the benchmark for the composite from the MSCI EAFE Growth (net) Index to the MSCI ACWI ex USA Growth Index. The Firm changed the benchmark in order to better reflect the Composite's exposure to emerging markets. Prior to March 1, 2016, the benchmark for the composite was the MSCI EAFE Growth (net) Index.

Minimum Account Size: All discretionary accounts in excess of \$2 million have been included in the composite.

Calculation of Results: Accounts are valued using trade date accounting and are denominated in U.S. dollars. Performance results reflect the reinvestment of interest, dividends, and realized capital gains and include cash, cash equivalents, convertible securities, and preferred securities, if applicable. Dividends and interest are recorded on an accrual basis and are net of all applicable foreign withholding taxes, if any.

Performance results are presented on a gross and net basis and include the reinvestment of all income. The net results reflect the deduction of 0.75%, representing the maximum advisory fees charged to client accounts during the respective periods in the International Growth Equity Composite. The actual fees paid by a client may vary based on assets under management and other factors. Past performance is no guarantee of future results.

Dispersion: The dispersion of annual return is measured by the standard deviation across asset-weighted portfolio returns represented within the composite for a full year. Prior to 2007, the dispersion of annual return was calculated across equal-weighted portfolio returns. For periods during which five or fewer accounts were included in the composite for a full year, standard deviation is not disclosed because it is not considered meaningful.

Fee Schedule: The management fee schedule is as follows: 0.75% on amounts up to \$25 million, 0.65% on next \$25 million, and 0.55% on amounts over \$50 million. The actual fees paid by a client may vary based on assets under management and other factors.
